MICON 5 - TACTILE SWITCHES

## MICON 5

Tactile switches

Tactile switch range MICON 5, with clear key click and extremely reliable switching. Use under overlay or under keycaps RK 90. THT and SMT versions which can be mounted automatically. All products are RoHS compliant.

# MICON 5

## Tactile switches

→ MICON 5 tactile switches offer an extremely high switching reliability while needing very little space. They can be arranged as single keys, in rows or key blocks.

When arranged under an overlay, MICON key switches should be combined with plungers.

The features at a glance:

- Suitable for the most common soldering methods
  - Wave soldering bath for THT versions
  - Reflow soldering for SMT version
  - Vapour phase soldering for SMT versions
  - Manual soldering
- SMT version suitable for processing with an automatic SMT assembly machines
- IMDS listed

You can download actual product information from our internet site [www.rafi.de](http://www.rafi.de) / Catalogues and Downloads

### Technical Data

#### → Dimensions

Length of housing	6.4 mm
Width of housing	5.1 mm
Overall height	see order block

#### → Mechanical design

Mounting	soldering
Terminals	see order block
Contact system	snap-action contact
Contact arrangement	1 NO
Contact materials	Au
Illumination	no

#### → Mechanical characteristics

Operating force F1 (±20%)	see order block
Switching travel S2 (±0.15 mm)	see order block

#### → Electrical characteristics

Rated voltage min.	0.02 V
Rated voltage max.	35 V
Rated current min.	0.01 mA
Rated current max.	100 mA
Rated power max. (ohmic load)	1 W
Contact resistance when new	≤ 100 mΩ
Rated voltage resistance AC	250 V
Insulation resistance	10 <sup>9</sup> Ω

#### → Other specifications

Ambient temp. operating min.	-40 °C
Ambient temp. operating max.	+90 °C
Resistance to environment	IEC 60068-2 -14,-30,-33, -78
Operating life (test force)	see order block
Solder heat resistance / Solderability	see order block
Flammability of materials	UL 94 V1
Packing	see order block
Produkt type	see order block
ROHS compliant	yes
REACH compliant	yes

J	SMT	DIN EN 60068-2-58	1.5 N	0.5 mm	1,000,000 (4 N)	1.14.002.201/0000

Packing: in tape, reel with 2100 pieces  
Keycaps see RK 90

Mounting hints:

Special pipette (Siemens Siplace order no.: 348514-02), mounting with collect and place head  
Recommendation for screen printing: 150 µm stencil with 10% reduction of the pad size.

The key switch **1.14.002.201/0000** does not provide tactile and audible feedback. It is therefore generally used only as a **redundant auxiliary switch** to other MICON standard switches, if this is required for safety reasons.

MICON 5 - PLUNGER ROUND, NOT ILLUMINABLE

## MICON 5 Plungers round, not illuminable

### → Description

A - Height of key switch: SMT type: 3.85 mm, THT type: 3.80 mm

D - Length of spacer  $D = GH - KP - FP$

FD - Front panel cut-out  $FD = ST + 1$  mm

FP - Front panel thickness

GH - Overall height:  $GH = A + L1 + 0.05$  (SMT type),  $GH = A + L1$  (THT type)

L - Overall length of plunger

RM - Key grid

ST - Diameter of plunger

The plungers can only be combined with MICON 5 version Standard (red bubble).

### Technical Data

#### → General information

Plunger diameter/size ST	see order block
Length of plunger L	see order block
Overall height GH with embossing	see order block
9.2 mm compatible	see order block

#### → Other specifications

ROHS compliant	yes
REACH compliant	yes

# GET IN TOUCH

## The uniqueness of the moment

Whenever a pushbutton or switch made by RAFI is used, the company's technology ensures that proper contact is made. For over 100 years now, we have driven innovation in human-machine communication and set standards across the globe. From operating elements and highly intelligent data entry systems to complete custom solutions from one source – all of our products are developed to meet the requirements of our long-standing customers. The results are excellent: close business relationships, innovative products and motivated employees.

MICON 5 - PLUNGER FOR SIGNAL INDICATOR

## Redundant system design with illuminable plungers MICON 1.14.002.201, 1.5 N

The tactile switch type **1.14.002.201/0000** is designed only for use in a **redundant system** with another SMT switch of standard height. For a redundant system design, the plunger sizes 14.5 x 14.5 mm or 18 x 18 mm must be used.

# RACON 8

## Tactile switches

→ RACON 8 tactile switches offer an extremely high switching reliability while needing very little space. They can be arranged as single keys, in rows or key blocks.

When arranged under an overlay, RACON key switches should be combined with plungers.

The features at a glance:

- Suitable for the most common soldering methods
  - Wave soldering bath for THT versions
  - Reflow soldering for SMT version
  - Vapour phase soldering for SMT versions
  - Manual soldering
- SMT version suitable for processing with an automatic SMT assembly machine
- IMDS listed

You can download actual product information from our internet site [www.rafi.de](http://www.rafi.de) / Catalogues and Downloads

# RACON 12 V Tactile switches with vertical adapter

- The RACON 12 V version can be used, for example, for PC plug-in boards and for measurement and control engineering applications. The vertical mounting adapter (support element) absorbs the operating force so that the pressure on the soldered terminals is reduced. For this mounting arrangement, the key switch is provided with two horizontal terminals on one side.

# RACON 12 I

## Tactile switches

### → Application note

Low-profile keyboards with RACON 12 i components should be designed with a grid spacing of 15.24 mm. With this grid, frame webs remain free between the individual keys. The overlay can be glued onto these frame webs; we recommend area embossing over the keys for the overlays. If our RK 90 system design is used, we recommend the 9 x 9 mm keycaps.

### Technical Data

#### → General information

# PCB KEY SWITCHES

RK 90 II, KEY CAP SYSTEM FOR RACON 12

## RK 90 II Key cap system for RACON 12 with individual sealing

### Technical Data

→ **General information**

Thickness of front panel	3.00 mm
Light conductor	see order block
Key grid	min. 16.8 x 17.5 mm
Degree of protection	IP65 (DIN EN 60529)

→ **Other specifications**

ROHS compliant	yes
REACH compliant	yes

The key cap system RK 90 II has been developed especially for the tactile switch RACON 12. The lenses are snapped onto the sealing frame and then set onto the RACON 12 key switches. The PCB presses this units against the front panel, so they are sealed.

Two versions of the sealing frames are provided with light conductors, either in square or triangle form. The lenses can be legended directly with laser. For bright letters (see picture) first white lenses are painted in dark, then the letters are cut out of the dark color with laser.

# Specifications LED

## LED brightness classes

LEDs are subject to production-related variations in brightness over which we have no control with the manufacturers. It is therefore not possible to arrange a delivery in a specific brightness class, and deviations accordingly do not constitute grounds for complaint regarding our products. The majority of the LEDs we use are delivered from

our suppliers in selected brightness classes. In this case, the brightness class is shown on a label on the switch's rack packaging. Where the lighting is required to have a uniform brightness – for aesthetic reasons, for example – this can be achieved in the system by means of the circuitry (with a series resistance, for example).

## 3 mm LED

(valid for 25 °C)	Red LED	Green LED	Yellow LED
Max. forward current I <sub>F</sub> :	30 mA	30 mA	20 mA
Current reduction from: T <sub>0</sub> = 50 °C:	approx 0.5 mA/°C	approx 0.5 mA/°C	approx 0.2 mA/°C
Wavelength typ:	635 nm	565 nm	586 nm
Forward voltage U <sub>F</sub> /I <sub>F</sub> typ:	2 V/10 mA	2 V/10 mA	2 V/10 mA
Reverse voltage U <sub>R</sub> /I <sub>F</sub> typ:	5 V/100 µA min.	5 V/100 µA min.	5 V/100 µA min.
Ambient temperature, operating:	- 20 °C ... + 80 °C	- 20 °C ... + 80 °C	- 20 °C ... + 80 °C
	Blue LED	White LED	Green LED superbright
Max. forward current I <sub>F</sub> :	20 mA	25 mA	30 mA
Current reduction from: T <sub>0</sub> = 50 °C:	approx 0.6 mA/°C	-	-
Wavelength typ:	470 nm	-	510-545 nm
Forward voltage U <sub>F</sub> /I <sub>F</sub> typ:	2.7 V/10 mA	3.6 V/20 mA	3.5 V/20 mA

Ambient temperature, operating:	- 20 °C ... + 80 °C	- 20 °C ... + 80 °C	-30 °C ... + 100 °C

## 2 mm LED (full illumination of RF 15/19)

(valid for 25 °C)	Red LED	Green LED	Yellow LED
Max. forward current I <sub>F</sub> :	30 mA	30 mA	50 mA
Current reduction from: T <sub>0</sub> = 50 °C:	0.5 mA/°C	0.5 mA/°C	0.8 mA/°C
Light current I <sub>V</sub> /I <sub>F</sub> typ:	-	-	250 mIm/20 mA
Wavelength typ:	637 nm	569 nm	590 nm
Forward voltage U <sub>F</sub> /I <sub>F</sub> typ:	1.8 V/20 mA	2.1 V/10 mA	1.9 V/20 mA
Reverse voltage U <sub>R</sub> /I <sub>F</sub> typ:	5 V/100 µA min.	5 V/100 µA min.	5 V/100 µA min.
Ambient temperature, operating:	- 55 °C ... + 100 °C	- 40 °C ... + 100 °C	-40 °C ... + 100 °C
	Blue LED	Multi-color LED	
Max. forward current I <sub>F</sub> :	30 mA	30 mA	
Current reduction from: T <sub>0</sub> = 50 °C:	-	approx 0.6 mA/°C	
Light current I <sub>V</sub> /I <sub>F</sub> typ:	-	-	
Wavelength typ:	464-485 nm	635/565 nm	
Forward voltage U <sub>F</sub> /I <sub>F</sub> typ:	3.6 V/20 mA	2 V/10 mA	
Reverse voltage U <sub>R</sub> /I <sub>F</sub> typ:	-	-	
Ambient temperature, operating:	- 20 °C ... + 80 °C	- 20 °C ... + 80 °C	

Calculating the series resistor:

$$R_V = \frac{U_B - U_F}{I_F}$$

Rated power of series:

$$P_V = I_F^2 \times R_V$$

Example for 5 Volt:

$$R_V = \frac{5V - 2,0V}{0,02A} = 150 \Omega (= \text{standard value})$$

# PCB KEY SWITCHES

RF 15 - TACTILE SWITCHES

## RF 15 Tactile switches

- Low-profile keyboards with RF 15 components should be designed with a 19.05 mm grid. With this grid, frame webs remain free between the individual keys. The overlay can be glued onto these frame webs; we recommend area embossing over the keys for the overlays.

Technical data of LED see separate page at the beginning of this chapter.

# PCB KEY SWITCHES

RF 15 N - TACTILE SWITCHES

## RF 15 N Tactile switches

→ The RF 15N key switch provides a minimum overall height of 6.2 mm. The overall height can be varied by extension plungers which are inserted into the cross-like notches on the actuator tops.

LEDs can only be arranged separately next to the key switches up to an overall height of 10 mm (i.e. without plunger or with small plunger).

Key switches with overall heights of 12 mm or more can be provided with a maximum of 2 LEDs which are inserted into the recesses of the key switch housing. LEDs of key switches with overall heights of 12.5 mm or more should be placed onto LED spacers in order to obtain satisfactory illumination.

### Technical Data

# RF 15 H

## Tactile switches

### → Application notes:

The RF 15 H key has an overall height of 12.5 mm and can be fully illuminated. When designing membrane keyboards, we recommend using a key grid of at least 20 mm and a 0.13 mm overlay with area embossing over the keys.

You can use the O-ring (accessory) to block the key and use it as an indicator field or blank spaceholder.

### Technical Data

#### → General information

Color of lens	see order block
Recommended key grid	20 mm

#### → Dimensions

Length	15 mm
Width	15 mm
Overall height	12.5 mm

#### → Mechanical design

Mounting	soldering in PCB
Terminals	THT
Contact system	snap-action contact
Contact arrangement	1 NO
Contact materials	see order block
Illumination	see order block
LED color	see order block
LED type	see order block

#### → Mechanical characteristics

Operating force max.	2.9 <sup>+0.6</sup> N
Switching travel	0.5 <sup>+0.2</sup> mm
Robustness max.	with through-plated PCB 100 N

#### → Electrical characteristics

Rated voltage min.	Au: 0.02 V, Ag: 3 V
Rated voltage max.	35 V
Rated current min.	Au: 0.01 mA, Ag: 0.1 mA
Rated current max.	Au: 100 mA, Ag: 250 mA
Rated power max. (ohmic load)	Au: 2 W, Ag: 12.5 W
Contact resistance when new max.	100 mΩ
Insulation resistance	10 <sup>9</sup> Ω

#### → Other specifications

Ambient temp. operating min.	-25 °C
Ambient temp. operating max.	+70 °C
Environmental resistance	acc. to IEC 60068-2-14, -30, -33 and -78
Operating life min. (operations)	1,000,000
Solderability / solder heat resistance	according to DIN EN 60068-2-20
Wave soldering	260 °C max.
Manual soldering	350 °C / 5 sec. max.
ROHS compliant	yes
REACH compliant	yes

Technical data of LED see separate page at the beginning of chapter 4 PCB Key switches.

# RF 19

## Tactile switches

### → Application notes:

RF 19 keys offer a large actuation area. When designing low-profile keyboards with a grid of  $\geq 23$  mm, frame webs remain free between the individual keys.

The overlay can be glued onto these frame webs; we recommend area embossing over the keys for the overlay.

### Technical Data

# PCB KEY SWITCHES

KN 19 - SHORT-TRAVEL MAIN SWITCH

## KN 19 Short-travel main switches

→ The KN 19 makes it possible to implement a power switch directly in a low-profile data entry system. This eliminates the need for extra switches on the device and additional openings in the overlay. In this way, you can achieve an optimum of safety and a consistent design.

The contact opening widths comply with the VDE standards. The KN 19 can also be employed underneath RK 90 keycaps. Other actuation functions (momentary, latching/momentary) available on request.

### Technical Data

#### → General information

Recommended key grid	19.05 x 38.1 mm
----------------------	-----------------

#### → Dimensions

Length	37.8 mm
Width	18.8 mm
Overall height	9.7 mm

#### → Mechanical design

Mounting	on PCB
Terminals	THT solder terminals
Contact system	snap-action bridge contact
Contact arrangement	see order block
Contact materials	Ag
Illumination	1 LED (max. 3 mm) possible
Degree of protection	IP40 (DIN EN 60529)
Hot wire ignition acc. to IEC 60695-2-1	850 °C

#### → Mechanical characteristics

Operating force max.	9 <sup>±3</sup> N
Operating travel	0.55 <sup>±0.15</sup> mm
Robustness max.	100 N

#### → Electrical characteristics

Rated voltage AC min.	12 V
Rated voltage DC min.	12 V
Rated voltage AC max.	250 V
Rated voltage DC max.	50 V
Ohmic load AC	6 A
Ohmic load DC max.	10 A
Ohmic load DC min.	0.1 A
Contact resistance when new max.	50 mΩ
Capacity input current AC max.	100 A
Rated motor current AC	4 A
Rated filament lamp current AC	2.4 A
Bouncing time max.	10 ms

#### → Other specifications

Ambient temp. operating min.	-25 °C
Ambient temp. operating max.	+70 °C
Environmental resistance	acc. to IEC 60068-2-14, -30, -33 and -78
Operating life AC	AC 250 V: 200.000 /2A; 100.000 /6A
Operating life DC	50,000(10 A / 50 V=)
Soldering time max.	3 s
Soldering temperature max.	350 °C
Flame class acc. to UL 94	UL 94 VO
ROHS compliant	yes
REACH compliant	yes

## Keycap system RK 90

Example with RF 15 key switches. Instead of RF 15 following key switches can be used:

- MICON 5
- RACON 8/12
- RF 15 tactile switches and signal indicators
- RF 19 tactile switches and signal indicators
- Short-travel main switch KN 19

The RK 90 system was granted the prize of the Design Forum of the Hannover Fair.

**Degree of protection: IP65 according to DIN in front of the panel, with silicone sealing.**

## Installation methods

### Installation from front

### Installation from rear

#### Mounting from front

Sealing foil between RK 90 keyboard and customer's front panel.

#### Mounting from rear

Sealing foil is screwed to RK 90 panel with fixing rails; sealing between keyboard and customer's front panel has to be provided.

## Legending

- **Laser printing:** This labelling method is possible for opaque keycaps. The symbols are engraved in the keycaps with laser.
- When using transparent lenses, the pressure pad can be legended by printing.

As the legending is protected by the lens, it is friction-proof.

- **Engraving:** With this method the keycaps are engraved with the required symbol and then inlaid with ink.

# PCB KEY SWITCHES

RK 90 - KEYCAP SYSTEM

## Recommendations

---

**● Front panel thickness:**

- **Aluminum:** 2 mm (1.5 mm min, 3 mm max.)  
(Fixing with M 3 pressed-in studs)

- **Steel:** 2 mm (3 mm max.); V2A: 1.25 mm  
(Fixing with M 3 welded-on studs)

The keytop surface is flush with the keyboard at a panel thickness of 3.5 mm.

**● Silicone sealing:**

Material: Silicone transparent

Type: A-SY 40-79

Hardness: 30° shore +/- 5°

Thickness: 0.45 +/- 0.05 mm

**● Installation:** Ensure that the keyboard slopes slightly so that any liquid can drain away between front panel and silicone sealing; if necessary, provide additional drain holes in the front panel.

---

## Cleaning liquids

---

For the cleaning of the plastic keycaps please do not use cleaning liquids based on alcohol or acid.

---

# RK 90

## Keycaps, plastic, 9 x 9 mm

Installation from front

Installation for rear

→ You can design especially small input fields with the small keycap 9 x 9 mm. For example, controls for measurement and laboratory equipment which do not offer much space for input fields because of their small size. RK 90 keycaps 9 x 9 mm and RACON tactile switches can be used to implement key grids of only 12.5 mm. The keycaps can be legended by laser-printing, engraving or standard printing.

This keycap is our first choice in a combination with the illuminated RACON 12 i tactile switch.

**Please note:** For the cleaning of the plastic keycaps please do not use cleaning liquids based on alcohol or acid.

# PCB KEY SWITCHES

RK 90 - KEYCAPS, ALUMINIUM, 14 MM

## RK 90 Keycaps, aluminum, 14 mm

→ The RK 90 system design with metal keycaps is fairly safe against mechanical, thermal or chemical effects. Combined with a metal front panel, this data entry system offers maximum protection against vandalism. Tried and tested MICON 5, RACON 8/12 or RF 15/19 PCB key switches are used underneath the metal keycaps.  
The keycaps can be provided with engraved, colored anodized or laser-printed legends. This means that the legend is durable and cannot be removed by mechanical or chemical means.

# PCB KEY SWITCHES

RG 85 III - PUSHBUTTONS/KEYS

## RG 85 III

Short-travel system

**Vandal-proof input system, ideally suited for elevator controls, info terminals, vending machines, etc.**

- Edge illumination and symbol illumination possible
- Connection: Each module individually with an 8-pin Micro-Match socket connector
- Modular fixing system with quick fasteners or single fixing
- Contact arrangement: 1 NO contact
- 35 V/250 mA max.
- Degree of protection IP65 (keylock switch IP40).
- Elevator standardm EN 81-70
- All products are RoHS compliant.

# PCB KEY SWITCHES

RG 85 III - PUSHBUTTONS/KEYS

## System Features

Perfectly suited for: elevator controls, info terminals, vending machines, etc.

- Vandal proof construction
- Modular fixing system with quick fasteners or single fixing method using thread studs
- Connection with keyed 8-pin micro-match connector
- Degree of protection: IP40/65

## Keylock Switch Features

- Round or square design and lens shape
- Edge illumination in one or two colours with 4 LED for each colour
- Lens material: Aluminum or stainless steel with plastic inlays
- Contact arrangement: 1 NO
- Cylinder lock with pin tumblers
- Two switching positions: 0 and 90 degrees, key can be removed in any position
- Lock type 5201 – other lock types on request
- Included: 2 keys

## Micro-Match Connector Pin Assignment

1/3 NO contact

2 OV – LED

4 Edge illuminat./signal indicator  
1<sup>st</sup> colour + 24 V DC +/- 20%

5 Symbol illumination  
+ 24 V DC±20%

6 Edge illuminat./signal indicator  
2<sup>nd</sup> colour + 24 V DC +/- 20%

7/8 NC contact

## Pushbutton Features

- Round or square design and lens shape
- Edge illumination in one or two colours with 4 LED for each colour
- Additional illumination of the symbol with 2 LED
- Lens material: Aluminum or stainless steel with plastic inlays
- Switching element: short-travel key switch RF 19
  - 1 NO contact, non-illuminated
  - 1 NO contact, fully illuminated

## Signal Indicator Features

- Lens shape round, square or triangular (arrow shape)
- Lens material: Translucent plastic material
- Fully illuminated with 5 LED

**Technical Data**→ **Dimensions**

Length	64 mm
Mounting grid min.	55 x 35 mm
Width	34 mm

→ **Mechanical design**

Version	see order block
Mounting	on U-rails or single mounting
Terminals	8-pin Micro-Match® female connector
Contact system	snap-action contact
Contact arrangement	see order block
Contact materials	Ag
Symbol illumination	see order block
Edge illumination	see order block

→ **Mechanical characteristics**

Operating force	3.5 N
Operating travel	1 mm
Switching travel NO	1 mm
Switching travel NC	0.6 mm

→ **Electrical characteristics**

Rated voltage min.	3 V
Rated voltage max.	35 V
Rated current min.	0.1 mA
Rated current max.	250 mA
Rated power max.	12.5 W
Contact resistance when new max.	100 mΩ
Contact resistance acc. to life max.	3 Ω
Bouncing time max.	10 ms
Operating voltage for LED	24 <sup>+20%</sup> V
Input current LED	per color/LED row 9 - 16 mA

→ **Other specifications**

Ambient temp. operating min.	-25 °C
Ambient temp. operating max.	+70 °C
Storage temperature min.	-40 °C
Storage temperature max.	+80 °C
Environmental resistance	acc. to IEC 60068-2-14, -30, -33 and -78
Operating life min. (operations)	1,000,000
Degree of protection rail mounting	IP40 (DIN EN 60529)
Degree of protection single mounting	IP65 (DIN EN 60529)
Flammability of materials	according to UL 94 HB
ROHS compliant	yes
REACH compliant	yes

# PCB KEY SWITCHES

RS 76 - FULL-TRAVEL KEY SWITCHES

## RS 76

Full-travel key switches

The RS 76 full-travel key switches are designed for configuring keyboards. They offer very comfortable operation with an overall height of 15.5 / 15.9 mm and a key travel of 4 mm. The modular system with a grid of  $3/4'' = 19.05$  mm enables you to design any key block you may want.

### Mechanical contact system RS 76 M

A gold alloy is used as the contact material and provides high contact reliability, low contact resistance and short bouncing time.

### Solid-state contact system RS 76 C

The solid-state switch in Hall-IC technology ensures bounce-free and wear-free switching and a long operating life. Function: When pressing the keys, a permanent magnet changes its position relative to the Hall-IC and thereby generates an output signal. Their use is especially recommended in hostile environments and for heavy duty applications.

- All products are RoHS compliant.

# PCB KEY SWITCHES

RS 76 M/C - FULL-TRAVEL KEY SWITCHES

The RAFI full-travel key switches RS 76 are modular systems for designing individual key blocks and keyboards in the 3/4 inch (= 19.05 mm) grid.

## Definitions

### Momentary key switches

Momentary key switches return to their initial position after being pressed (momentary action).

### Latching key switches

Latching key switches lock when actuated and are returned to their initial position when pressed again (push-push action).

### Keycap materials

Keycap without legend insert: ABS

Keycap with legend insert:

– Keycap body: ABS

– Lens: PC

### Keycap, n-module

A 2-module keycap f. ex. has the twofold length of a 1-module keycap.

### Contact principle

There are two contact principles:

– **Mechanical (M):** Cross contact (RS 76 M)  
Bridge contact  
(RS 76 M, illuminated)

– **Contactless (C):** Based on Hall-IC (RS 76 C)

### Manual Soldering

The soldering temperature should not exceed 300 °C and the soldering time should be less than 5 seconds.

## Legending of keycaps

Keycaps can be legended by different methods:

### Two-shot moulding

Using this method the symbol is separately manufactured from a plastic and then the appropriate keycap form is moulded round it. Advantage: The character becomes an integrated part of the keycap, thus eliminating abrasion. All RAFI keycap sets with standard legending are manufactured by this method.

Customer specific two-shot moulded keycaps on request.

### Printing

Keycaps can be printed with a two-component ink on request. The abrasion of this kind of legending is high. This method of legending is suitable for average volumes.

### Engraving

In this labour intensive process the keycaps are engraved with the required symbol, then inlaid with ink. Only used for small volumes.

### Laser-printing

This method of legending can be recommended when complete keyboards are required in different keyboard layouts for which RAFI will develop the respective software. The keyboards can then be legended within a short time. This method of legending is particularly recommended for average to large volumes.

### Legend inserts

In the case of keycaps with replaceable legend inserts it is possible to print or engrave the legend inserts. As these inserts are protected by the lens, there can be no abrasion here either.

RS 76 M/C - FULL-TRAVEL KEY SWITCHES

## Hole pattern PCB RS 76 M/C

The hole patterns apply to the horizontal position of the keycaps only. Should they be in a vertical position,

the momentary key switch must be mounted accordingly, i. e. rotated by 90°.

### For 1 – 13/4-module keycaps (view on component side)

Momentary key switch, non-illuminated

Momentary key switch, non-illuminated

RS 76 M

RS 76 C

### For 2-, 3- and 8-module keycaps (view on component side)

Momentary key switch, non-illuminated

RS 76 M/C

Keycap	L 1 mm	L 2 mm
2-module	25.40	22.86
3-module	30.48	24.13
5-module	68.58	68.58

**Important note:** In the case of 2-, 3- and 8-module keycaps, additional holes must be provided for the accessories. In the case of keycaps < 2-module, neither accessories nor holes are required.

### Technical Data

#### → General information

Color	see order block
Form of collar	square

#### → Dimensions

Length of collar	19 mm
Width of collar	19 mm
Overall height	19.5 mm

#### → Mechanical design

Mounting	soldering
Terminals	tin-plated
Contact system	cross contact self cleaning
Contact function	see order block
Contact materials	Au alloy
Illuminability	no
Lock	Micromec
Wafers	5
Lock type	001
Number of locking positions	500
Main key	on request
Key removal position	see order block

#### → Mechanical characteristics

Switching torque	0.04 ... 0.10 Nm
Robustness max.	2 Nm
Dielectric strength AC min.	500 V
Rated power max.	1 W

#### → Electrical characteristics

Rated voltage	2 ... 35 V
Rated current max.	100 mA
Contact resistance when new max.	100 mΩ
Contact resistance acc. to life max.	200 mΩ
Insulation resistance	10 <sup>9</sup> Ω
ESD strength max.	8 kV

#### → Other specifications

Rotating angle	see order block
Operating life	10,000
Degree of protection from front side	IP54
Ambient temp. operating min.	-25 °C
Ambient temp. operating max.	+70 °C
Storage temperature min.	-40 °C
Storage temperature max.	+80 °C
Environmental resistance	acc. to IEC 60068-2-14, -30, -33 and -78
Flammability of materials	UL 94 HB
ROHS compliant	yes
REACH compliant	yes
